Job Opening for Business Controller at Morphotonics

Essentials

- *Master degree in business economics or equivalent;*
- *Working experience 3-5 years;*
- *Reporting to the CEO;*
- *Hands-on, team spirit, result-driven.*

Who we are

Morphotonics B.V., a high-tech scale-up, develops and sells roll-to-plate (R2P) OEM production technology for imprinting nano- or microstructures on extremely large area substrates. Our cutting-edge technology and machines have unique features that radically improve our customers' products in the display and solar industry.

We enable holographic or 3D imaging in smartphones or AR/VR displays and substantially increase the energy efficiency of solar panels. We work for innovative companies and market leaders in Silicon Valley and Asia.

Working for a scale-up company means that the job is diverse, challenging, fun and giving a lot of autonomy. This requires strong analytical skills and great teamwork. Our 25 team members take much pride in their job and get substantial responsibility toward customers in delivering what we promise.

Your role

With our R2P technology growing further into series of (semi-) standardized OEM products that are currently being pulled into the market by various customers, Morphotonics is now looking for a business controller to support our team's growth ambitions.

You are enthusiastic about Morphotonics' technology and you have 3-5 years of experience in preferably a tech environment. You will act as a business partner to our development and operations teams and drive effective decision making based upon transparent financial information. You will take responsibility in closely monitoring the financial health of Morphotonics and its underlying projects. You typically maintain, manage, and analyze payroll, budgets & CAPEX and you keep a very close eye on our cashflow, reporting directly to the CEO. You will be in close contact with our customers that vary in size from dynamic start-ups to established multinationals and you manage a smooth and successful customer invoicing, reporting and cashflow management.

Job Description

- Have an independent finance-based view on the company and its several projects;
- Optimize process and analyses to satisfy the need for management information;
- Set up an effective business review cycle;
- Validate business cases;
- Partner with and drive the Morphotonics team to achieve their short- and long-term objectives;
- Identify (business and financial) risks and opportunities;
- Execute ad hoc analysis and reporting, e.g., for our Supervisory Board or our investor(s);
- Ready to support investor financing rounds wherever and whenever applicable;
- Profound understanding of finance in the broadest sense.

morphotonics

Experience

- 3-5 years track record in financial and business control, preferably in high-tech businesses;
- Proven experience in (financial) project management;
- Sound computer skills, particularly in Excel;
- Proven to communicate financial information into business language so all understand.

Required educational background

- Master degree in Business Economics or Business Administration;
- Fluency in English.

Personal skills

- Result oriented and getting things done;
- Self-starting and ambitious;
- Disciplined, hands-on team player;
- Ownership from start to completion;
- Excellent communication and project management skills.

Morphotonics offers a challenging and dynamic job in an innovative environment with competitive benefits. Morphotonics is a financially healthy scale-up where you can truly have an impact on new consumer tech products that will impact global markets and sustainability. If interested, please send your cover letter and resume to onno.lint@morphotonics.com

Please note that acquisition by (recruitment) agencies as a result of this job opening is not appreciated and will not have follow-up.
